NIMH	1R01MH081750-01A1
Patient Portal to Support Treatment Adherence.	
The goals for this project to develop and test a randomized controlled trial for increasing treatment adherence among HIV+ persons with multiple health concerns via interventions delivered via secure patient web portal.	
Role: Co-Investigator & Project Director	

Vitiello (PI)	09/01/08-7/31/2013
NIA	

Integrated Care for Osteoarthritis Pain and Insomnia

The goals for this project are 1) develop an integrated intervention for osteoarthritis pain patients with sleep disturbances, 2) conduct a randomized control trial of the integrated intervention compared to a pain-only and control group for 375 osteoarthritis pain patients with sleep disturbance. The intervention will expand upon previous work in cognitive-behavioral treatment of osteoarthritis pain, integrating CBT techniques to improve sleep. Participants will be assessed at baseline and at 2, 6, 12, and 24 months.
